

Perfection in every single cone

 **Patodia** Eurotex  
Group

# We make your need for quality yarn our *only* priority at the Patodia Group of Industries

When customer focus is not just a value statement but a way of life, the mission and vision of a Company just naturally fall into place – to provide you, the customer, with high quality cotton yarns and textiles at reasonable prices and at service levels which rival the world's best.

The Patodia Group of Industries founded by the late visionary B L Patodia in 1938, as a trading concern in cotton and art silk yarns, which went on to become the largest distributor of yarns in India. Today, the Patodia Group focuses on producing top of the line 100% combed cotton yarn and has 4 spinning companies under its umbrella - PBM Polytex Limited, BLP Super Spinners and Eurotex Industries Unit 1 and Unit 2 and an export trading house by the name of Patodia Syntex Limited. As each Company specialises in a particular variety of combed cotton, we can ensure that varying customer requirements are given detailed attention and time.

The Patodia Group is proud to export its yarns to an enviable client list which includes over 56 destinations around the globe. With an annual export turnover of over \$ 250 million, the Patodia Group is well poised to explore new territories and opportunities.

## RAW MATERIAL

Great things begin with strong foundations. High quality yarn begins with superior raw material. By setting up base in the high yielding cotton growing areas of Maharashtra, Madhya Pradesh and Gujarat, we, at Patodia Group have ensured that we have access to only the best raw material.

To make sure that every single bale (lot of 50 bales) meets our stringent quality control requirements, all cotton is tested and approved by our specialists pre purchase.

The following are our testing parameters –

1. Staple length
2. Uniformity
3. Micronaire
4. G/Tex
5. Trash percentage
6. Short fibre
7. Contamination
8. Moisture

With a view to diversify our range of product offerings, we are also sourcing cotton from Egypt, West Africa, Australia and USA.

## PRODUCTION

The manufacturing of a high quality product starts with raw material sourcing and needs to be continued in the spinning process. Our top quality yarns are manufactured with the latest technology equipments available from world leaders like

- Rieter,
- Schlarforst
- Murata
- SSM
- Trulzchler
- Vijay Laxmi
- Lakshmi Rieter.

We are continuously adapted to new developments. We constantly search for improvements and make sure that our findings are immediately introduced into our production process.

## PEOPLE

Our commitment to quality is not a value we reserve only for our clients. At Patodia Group, it's a guiding philosophy which applies to our key asset – our people.

With our reputation as an industry leader, the Patodia Group is fortunate to attract a large number of qualified individuals from varying backgrounds. Our diversity and talent ensures a vibrant work environment, which inspires creativity, professionalism and a strong commitment to our clients.

We are happy to be associated with several training opportunities for our employees.

## QUALITY

From the cotton picker who is the first contact point with the raw material for yarn to the sophisticated machines that process the material to our after sales service. Our commitment to quality encompasses every aspect of yarn making to ensure that our clients receive nothing but the finest quality. With a high quality bench mark, our clients now expect nothing but the best from us, a fact that is borne out by one of the highest repeat business statistics in the industry.

Our ISO 9001 certification, then, is just a natural extension of our already proven client approval.

At the Patodia Group, our quality is a promise. Enshrined and embedded in our work culture, we strive only for excellence.

## PRODUCT PROFILE
