India to grow at 7.4% in FY17: HSBC

New Delhi, July 7: The Indian economy may grow at a slightly slower pace of 7.4% this fiscal amid weaker global demand and risk aversion, said an HSBC report, flagging "methodological concerns" in computation of official GDP data.

According to the global financial services major, some of the factors that are weighing on the economy include weaker global demand, banking sector risk aversion, sluggish domestic private investment, gradually climbing oil prices, and statistical auto-correction in growth prints.

"All considered, we expect GDP growth to slow gently from 7.6% last year to 7.4% in 2016-17 and further to 7.2% in 2017-18," HSBC said in a research note, adding that despite lower prints, this will be among the best growth performances globally.

The first quarter GDP growth print was 7.9% year-on-year, primarily led by urban consumption demand.

According to HSBC, the GDP data are "fraught with methodological concerns" and once it made some adjustments, the actual growth was 6-6.5%, 150 bps below the official estimate. It further noted that some of the growth overestimation—around 80 bps—could be to correct over the next six quarters. "We expect growth to gather pace over the medium term (2.5 year horizon) as the impact of reforms starts to unfold," it said. P77
